BTL EMSELLA®

A Breakthrough
in Intimate Health

BACKED BY SCIENCE

Scientific research has shown that **95%** of treated patients reported **significant improvement** in their **quality of life**.*

A frontal view of the **pelvic floor muscles and bladder** using ultrasound imaging.

FULLY FOCUSED ON PELVIC FLOOR

BTL EMSELLA utilizes **High-Intensity Focused Electromagnetic technology (HIFEM)** to cause **deep pelvic floor muscles stimulation** and restoration of the neuromuscular control. Key effectiveness is based on **focused electromagnetic energy, in-depth penetration** and stimulation of the **entire pelvic floor area**.

A single BTL EMSELLA session brings **thousands of supramaximal pelvic floor muscle contractions**, which are extremely important in muscle re-education of **incontinent patients, women after childbirth** and those with **decreased intimate satisfaction**.

REVENUE**

“We place all our stress incontinence and overactive bladder patients on this chair. They are loving the 28-minute treatments. It is so easy sitting fully clothed on the chair, reading a magazine, and getting a full pelvic workout as if you had a private pelvic floor trainer beside you without the sweat!”

Red Alinsod, M.D.
Alinsod Institute for Aesthetic
Vulvovaginal Surgery, Laguna Beach, CA

“Benefits we are beginning to see are that with stronger muscle tone in the pelvis, the sexual satisfaction in our patients is enhanced. Being that orgasmic response involves muscle contractility it follows that with increased strength and blood flow to the area there is improved sexual gratification.”

Carolyn DeLucia, M.D., FACOG
Ob/Gyn & Co-Founder V-Spot
Medispa, New York, NY

“The results have been really rewarding. There are many patients who really call this a life-changing experience. When we treat the patients with EMSELLA, whether we are doing a RF treatment in conjunction or laser treatment in conjunction, one of the things I am most impressed with as a provider is how much their lives are changed.”

Julene B. Samuels, M.D.
Julene B. Samuels, MD, FACS
Louisville, KY

*Data on file. Individual results may vary. **Once the therapy is started, there is no need for an additional operator activity.
